

PHOENIX
— OMEGA WEATHERPLEX

MULTIPLX

WITH INTEGRATED CONDENSER

TYPE: MULTIPLX

FORM: OUTDOOR

CONDENSER: INTEGRATED

QUALITY

- Manufactured under strict **ISO9001 quality management**
- A high strength, low vibration laser cut frame
- Housing made from 25mm chromodek insulated panels
- Steel discharge headers which eliminate discharge pipe cracks
- Integrated electrical panel with controller
- Wiring done to SANS regulations pre-tested and includes routine test certificate
- Component layout designed for easy access for service and repair
- Only premium branded line components used
- Receivers manufactured and certified to European specifications

INNOVATIVE

- IP 54 rated VSD increases efficiency
- Capacity unloaders allows for additional steps of capacity control
- Soft starters to reduce compressor starting current
- EC fan option for low-noise and floating head pressure savings

VERSATILE

- Suitable for high, medium, low and dual temp applications
- All major compressor brands available
- Compact 500mm or 630mm V-Coil condensers
- Condenser range from 6.6 kW/K to 51 kW/K

ADVANTAGES

- A “plug and play” solution to save valuable on site time
- Condenser pipe work and fan wiring is pre-installed and factory tested
- No need for expensively built plant rooms
- Ideal for sites with limited space
